

Electrical Safety Recall

KEUNE STRAIGHTENING IRON

Keune is conducting a voluntary product recall for the Keune Straightening Iron sold only in hairdressing salons from 01/11/07.

A potential risk has been identified in the power cord of the appliance, where under certain circumstances the internal wiring might break inside the power cord, this might lead to short circuiting of the iron.

Users of the Keune Straightening Iron should cease using the iron and return it to the salon where they purchased the iron from. Keune will replace all irons with new irons via the salon.
